

MB-920 Demo

Question: 1

DRAG DROP

A company plans to implement Dynamics 365 Supply Chain Management. Match each manufacturing strategy to its definition.

To answer, drag the appropriate manufacturing strategy from the column on the left to its definition on the right. Each manufacturing strategy may be used once, more than once, or not at all.

NOTE: Each correct selection is worth one point.

Manufacturing strategies

Make-to-order

Make-to-stock

Configure-to-order

Engineer-to-order

Answer Area

Definition

Calculate minimum quantities required to replenish inventory based on historic consumption.

Trigger expensive steps of the value chain by using a sales order or transfer order.

Create a prototype item based on specific requirements.

Question: 2

HOTSPOT

A company uses Dynamics 365 Supply Chain Management. The company plans to implement Asset Management.

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Assets are single-level objects. You cannot create sub-assets.	<input type="radio"/>	<input type="radio"/>
You can define locations and assign assets to locations for tracking purposes.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
Assets are single-level objects. You cannot create sub-assets.	<input type="radio"/>	<input checked="" type="radio"/>
You can define locations and assign assets to locations for tracking purposes.	<input checked="" type="radio"/>	<input type="radio"/>

Question: 3

HOTSPOT

A company is evaluating Dynamics 365 Supply Chain Management.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can initiate new production based on demand, open orders, and historical trends, as well as take into consideration the time to manufacture and ship product to customers.	<input type="radio"/>	<input type="radio"/>
You can account and plan for subcontracting services such as painting metal parts, during production.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
You can initiate new production based on demand, open orders, and historical trends, as well as take into consideration the time to manufacture and ship product to customers.	<input checked="" type="radio"/>	<input type="radio"/>
You can account and plan for subcontracting services such as painting metal parts, during production.	<input checked="" type="radio"/>	<input type="radio"/>

Question: 4

DRAG DROP

A company plans to implement Dynamics 365 Supply Chain Management. You need to recommend

manufacturing process types for the company.

What should you recommend? To answer, drag the appropriate manufacturing process types to the correct scenarios. Each manufacturing process type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Manufacturing process types	Answer Area						
Discrete	<table border="1"> <thead> <tr> <th>Scenario</th> <th>Manufacturing process type</th> </tr> </thead> <tbody> <tr> <td>Produce items including food and pharmaceuticals that cannot be reverted to original ingredients.</td> <td>Manufacturing process type</td> </tr> <tr> <td>Produce items including automobile engines that may be disassembled.</td> <td>Manufacturing process type</td> </tr> </tbody> </table>	Scenario	Manufacturing process type	Produce items including food and pharmaceuticals that cannot be reverted to original ingredients.	Manufacturing process type	Produce items including automobile engines that may be disassembled.	Manufacturing process type
Scenario	Manufacturing process type						
Produce items including food and pharmaceuticals that cannot be reverted to original ingredients.	Manufacturing process type						
Produce items including automobile engines that may be disassembled.	Manufacturing process type						
Process							

Answer:

Explanation:

Manufacturing process types	Answer Area						
Discrete	<table border="1"> <thead> <tr> <th>Scenario</th> <th>Manufacturing process type</th> </tr> </thead> <tbody> <tr> <td>Produce items including food and pharmaceuticals that cannot be reverted to original ingredients.</td> <td>Process</td> </tr> <tr> <td>Produce items including automobile engines that may be disassembled.</td> <td>Discrete</td> </tr> </tbody> </table>	Scenario	Manufacturing process type	Produce items including food and pharmaceuticals that cannot be reverted to original ingredients.	Process	Produce items including automobile engines that may be disassembled.	Discrete
Scenario	Manufacturing process type						
Produce items including food and pharmaceuticals that cannot be reverted to original ingredients.	Process						
Produce items including automobile engines that may be disassembled.	Discrete						
Process

Question: 5

A company plans to implement Dynamics 365 Supply Chain Management.

The company wants shop floor workers to register their daily work by using the production floor execution interface.

Which two activities can employees perform by using the tool? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Schedule a production order.

- B. Register scrap quantity during production.
- C. Register raw material consumption.
- D. Clock in and clock out.

Answer: B, D

Explanation:
