Cisco 300-430 Exam Question & Answers (Demo) **Implementing Cisco Enterprise Wireless Networks** Hittes: Illere Polaye Hannes. Com **Exam**

Version: 14.0

On a branch office deployment, it has been noted that if the FlexConnect AP is in standalone mode and loses connection to the WLC, all clients are disconnected, and the SSID is no longer advertised. Considering that FlexConnect local switching is enabled, which setting is causing this behavior? A. ISE NAC is enabled B. 802.11r Fast Transition is enabled C. Client Exclusion is enabled D. FlexConnect Local Auth is disabled Explanation: Question: 2 An engineer must implement intrusion protection on the WLAN. The AP coverage is adequate and on-channel attacks are the primary concern. The building is historic, which makes adding APs difficult. Which AP mode and submode must be implemented? A. AP mode: local, AP submode: none B. AP mode: monitor, AP submode: none D. AP mode: monitor, AP submode: none D. AP mode: local, AP submode: NIPS Explanation: Question: 3 Answer: D		
On a branch office deployment, it has been noted that if the FlexConnect AP is in standalone mode and loses connection to the WLC, all clients are disconnected, and the SSID is no longer advertised. Considering that FlexConnect local switching is enabled, which setting is causing this behavior? A. ISE NAC is enabled B. 802.11r Fast Transition is enabled C. Client Exclusion is enabled D. FlexConnect Local Auth is disabled Answer: D Explanation: Question: 2 An engineer must implement intrusion protection on the WLAN. The AP coverage is adequate and on-channel attacks are the primary concern. The building is historic, which makes adding APs difficult. Which AP mode and submode must be implemented? A. AP mode: local, AP submode: none B. AP mode: monitor, AP submode: WIPS C. AP mode: monitor, AP submode: WIPS C. AP mode: local, AP submode: WIPS Explanation: Answer: D Explanation:	Question: 1	
and loses connection to the WLC, all clients are disconnected, and the SSID is no longer advertised. Considering that FlexConnect local switching is enabled, which setting is causing this behavior? A. ISE NAC is enabled B. 802.11r Fast Transition is enabled C. Client Exclusion is enabled D. FlexConnect Local Auth is disabled Explanation: Question: 2 An engineer must implement intrusion protection on the WLAN. The AP coverage is adequate and on-channel attacks are the primary concern. The building is historic, which makes adding APs difficult. Which AP mode and submode must be implemented? A. AP mode: local, AP submode: none B. AP mode: monitor, AP submode: wIPS C. AP mode: monitor, AP submode: wIPS C. AP mode: local, AP submode: WIPS Explanation: Answer: D Explanation:		
A. ISE NAC is enabled B. 802.11r Fast Transition is enabled C. Client Exclusion is enabled D. FlexConnect Local Auth is disabled Answer: D Explanation: Question: 2 An engineer must implement intrusion protection on the WLAN. The AP coverage is adequate and on-channel attacks are the primary concern. The building is historic, which makes adding APs difficult. Which AP mode and submode must be implemented? A. AP mode: local, AP submode: none B. AP mode: monitor, AP submode: WIPS C. AP mode: monitor, AP submode: None D. AP mode: local, AP submode: WIPS Explanation: Answer: D		
B. 802.11r Fast Transition is enabled C. Client Exclusion is enabled D. FlexConnect Local Auth is disabled Answer: D Explanation: Question: 2 An engineer must implement intrusion protection on the WLAN. The AP coverage is adequate and on-channel attacks are the primary concern. The building is historic, which makes adding APs difficult. Which AP mode and submode must be implemented? A. AP mode: local, AP submode: none B. AP mode: monitor, AP submode: WIPS C. AP mode: monitor, AP submode: none D. AP mode: local, AP submode: WIPS Explanation: Answer: D	Considering that FlexConnect local switching is enabled, which setting	ng is causing this behavior?
C. Client Exclusion is enabled D. FlexConnect Local Auth is disabled Answer: D Explanation: Question: 2 An engineer must implement intrusion protection on the WLAN. The AP coverage is adequate and on-channel attacks are the primary concern. The building is historic, which makes adding APs difficult. Which AP mode and submode must be implemented? A. AP mode: local, AP submode: none B. AP mode: monitor, AP submode: WIPS C. AP mode: monitor, AP submode: mone D. AP mode: local, AP submode: WIPS Explanation: Answer: D		
Explanation: Question: 2 An engineer must implement intrusion protection on the WLAN. The AP coverage is adequate and on-channel attacks are the primary concern. The building is historic, which makes adding APs difficult. Which AP mode and submode must be implemented? A. AP mode: local, AP submode: none B. AP mode: monitor, AP submode: WIPS C. AP mode: monitor, AP submode: none D. AP mode: local, AP submode: WIPS Explanation: Answer: D		
An engineer must implement intrusion protection on the WLAN. The AP coverage is adequate and on-channel attacks are the primary concern. The building is historic, which makes adding APs difficult. Which AP mode and submode must be implemented? A. AP mode: local, AP submode: none B. AP mode: monitor, AP submode: WIPS C. AP mode: monitor, AP submode: none D. AP mode: local, AP submode: WIPS Answer: D Explanation:	D. FlexConnect Local Auth is disabled	
An engineer must implement intrusion protection on the WLAN. The AP coverage is adequate and on-channel attacks are the primary concern. The building is historic, which makes adding APs difficult. Which AP mode and submode must be implemented? A. AP mode: local, AP submode: none B. AP mode: monitor, AP submode: WIPS C. AP mode: monitor, AP submode: none D. AP mode: local, AP submode: WIPS Answer: D Explanation:		Answer: D
An engineer must implement intrusion protection on the WLAN. The AP coverage is adequate and on-channel attacks are the primary concern. The building is historic, which makes adding APs difficult. Which AP mode and submode must be implemented? A. AP mode: local, AP submode: none B. AP mode: monitor, AP submode: WIPS C. AP mode: monitor, AP submode: none D. AP mode: local, AP submode: WIPS Answer: D Explanation:	Explanation:	
on-channel attacks are the primary concern. The building is historic, which makes adding APs difficult. Which AP mode and submode must be implemented? A. AP mode: local, AP submode: none B. AP mode: monitor, AP submode: WIPS C. AP mode: monitor, AP submode: none D. AP mode: local, AP submode: WIPS Explanation: Answer: D	Question: 2	
on-channel attacks are the primary concern. The building is historic, which makes adding APs difficult. Which AP mode and submode must be implemented? A. AP mode: local, AP submode: none B. AP mode: monitor, AP submode: WIPS C. AP mode: monitor, AP submode: none D. AP mode: local, AP submode: WIPS Explanation: Answer: D		
B. AP mode: monitor, AP submode: WIPS C. AP mode: monitor, AP submode: none D. AP mode: local, AP submode: WIPS Answer: D Explanation:	on-channel attacks are the primary concern. The building is his	
B. AP mode: monitor, AP submode: WIPS C. AP mode: monitor, AP submode: none D. AP mode: local, AP submode: WIPS Answer: D Explanation:	A. AP mode: local. AP submode: none	
D. AP mode: local, AP submode: WIPS Answer: D Explanation:		
Explanation:	C. AP mode: monitor, AP submode: none	
Explanation:	D. AP mode: local, AP submode: WIPS	
<u> </u>		Answer: D
Question: 3	Explanation:	
_ •	Question: 3	

An engineer is implementing a FlexConnect group for access points at a remote location using local switching but central DHCP. Which client feature becomes available only if this configuration is changed?

C. fast roaming	
D. mDNS	
	Answer: B
Explanation:	
Question: 4	
A FlexConnect remote office deployment is using five 2702i APs indo When a code upgrade is performed and FlexConnect Smart AP Important FlexConnect Master AP has been configured, how many image transwill occur?	age Upgrade is leveraged, but no
A. 1 B. 2 C. 5	
B. 2 C. 5	Answer: B
B. 2 C. 5 D. 7	Answer: B
B. 2 C. 5 D. 7	
B. 2 C. 5 D. 7 Explanation: Question: 5 Where is a Cisco OEAP enabled on a Cisco Catalyst 9800 Series Wirel A. RF Profile B. Flex Profile C. Policy Profile	
B. 2 C. 5 D. 7 Explanation: Question: 5 Where is a Cisco OEAP enabled on a Cisco Catalyst 9800 Series Wirel A. RF Profile B. Flex Profile
